Partners in Ideas Foundation (PIF) is an independent private foundation in Latvia promoting the practice of philanthropy that is focused on long-term changes.

PIF currently supports social entrepreneurship start-ups, initiatives addressing the quality of education, and adequate employment opportunities for people with disability as well as the strengthening of NGO financial and organisational capacity through close partnerships with leading businesses and collaboration with the public sector.

PIF's capital is experience, creativity, partnerships and passion! By generating ideas and applying business solutions to societal problems, PIF creates new opportunities for the corporate sector and private donors to get involved and excited about their philanthropic giving.
