Social Entrepreneurs Ireland (SEI) aims to ignite social change by investing in and supporting social entrepreneurs; innovators who create high-impact solutions to some of Ireland's entrenched social and environmental problems and who work to increase social capital within Ireland's communities. SEI works with the business, third-level, public and voluntary sectors to directly support these early-stage social entrepreneurs and to celebrate and promote their activities to a wider audience. SEI focuses on a high-engagement, capacity-building approach as opposed to programme funding. Launched in 2005, to date SEI has invested in over 140 social entrepreneurs.
